DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rzepka 1,438,140.

Rzepka teaches a lock housing comprising a first latch bolt 15,17,18, first driver 26, second latch bolt 15,19,20, second driver 28, wherein the drivers and bolts have front and rear biasing surfaces (for example, at right side of 19 and left side of 28/ at right hook portion of 28 and left side of hook 20 – see page 2, lines 35-48) and the drivers are coaxially mounted with an knob (crank) actuator having a rectangular hub 24.

Allowable Subject Matter

3. Claims 2-7 are allowed.

The prior art of record fails to teach the two latch bolts and drivers in combination with the extension member, adjusting member and pin and clutch mechanism as set forth in claim 2.

Art Unit: 3676

With regard to claim 7, while several cited patents teach the well known means for providing backset adjustment to accommodate differently sized lock housings (note, for example, Fan Lu et al 6,443,503, Glass et al 4,602,490), there would have been no motivation or suggestion to provide the latch set of Rzepka with such an extension means absent improper hindsight.

Response to Arguments

4. Applicant's arguments filed 10/7/04 have been fully considered but they are not persuasive. As set forth above, the patent to Rzepka clearly teaches first and second biasing portions on both the bolts and drivers as clearly recited on page 2, lines 35-48. Furthermore, the crank of new claim 9 is taught by the knob of Rzepka. Accordingly, claims 1 and 9 stand rejected.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
